GEOCERAMICA®
Porcelain + Paver

The perfect choice for lasting beauty with unmatched durability. GeoCeramica blends the modern look of porcelain with the strength of concrete pavers. A choice that will never go out of style.

THE BEST OF BOTH WORLDS...

DURABLE

- FADE RESITANT: GeoCeramica's vibrant colors will never fade
- SCRATCH RESISTANT: Ideal for high-traffic areas and heavy planters or furniture
- SLIP RESISTANT: Rated safe for virtually all outdoor uses including pool decks
- WARRANTIED: 10 year product warranty against manufacturing defects

LOW MAINTENANCE

- STAIN RESISTANT: Dense porcelain surfaces resist staining from food and beverages — or whatever Mother Nature throws at it
- EASY TO CLEAN: Surfaces clean-up easily with soap and water
- POROUS BASE: Stabikorn paver base makes GeoCeramica highly resistant to the effects of freeze/thaw, salts, pool and lawn chemicals

EASY TO INSTALL

- INSTALLS LIKE A CONCRETE PAVER: Traditional porcelain installation methods add substantial complexity, time and cost to a project. GeoCeramica installs with virtually the same equipment and techniques as traditional concrete pavers.
