Rockwood® Lakeland Retaining Wall Blocks

Lakeland™ blocks recreate the sophisticated look of an old brick wall so popular with property owners today. This tumbled, multi-piece system offers designers the opportunity and freedom to combine functionality with style. Lakeland blocks can be used to build random-patterned outdoor features such as kitchens, island/bars, garden/seatwalls, pillars, planters, and more.

Rockwood® Lakeland Retaining Wall Blocks

The Advantages of a Rockwood Lakeland Wall...

It's Fast...
Lakeland™ is an easy to use, multi-piece, mortarless, and pinless wall system. Simply stack and secure Lakeland blocks with a high quality masonry adhesive, to build lasting, functional, and attractive outdoor environments.

It's Simple...
Each unit weighs between 10 and 30 lbs., making Lakeland as easy to handle, as it is to install. Its size makes it perfect for any weekend project such as garden walls, seat walls, pillars, columns, planters, egress windows, and small retaining walls.

It's Strong...
Lakeland blocks are made from strong, drycast concrete and will maintain their unique, weathered appearance and earthy colors for generations.

It's Versatile...
Offering greater design flexibility than pin and lip systems, Lakeland is as popular for its build-ability as it is for its great looks. The three units can be arranged to create an endless variety of unique applications.

Manufactured in accordance with ASTM C1372. Unit availability, color and specifications vary by manufacturer. Contact your nearest Rockwood manufacturer or dealer for more information. Nominal dimensions shown.
